PRODUCT DATA SHEET

Decco Antifoam 81

Dimethyl Polysiloxane

DESCRIPTION

Some Decco processes, such as, drenchers, dip tanks, wash tanks, holding tanks, etc, in the field generate foam while in operation. In many instances foaming is undesirable, as it may tend to spot or mark the treated fruit pieces. Where necessary we recommend this food grade antifoam product for use by our service personnel or by our customers who use our products.

DIRECTIONS FOR USE

Decco Antifoam 81 is a repackaged food grade-defoaming agent containing FDA approved silicone fluid (a.i. Dimethyl Polysiloxane). The allowable direct use limit is 1 to 10 ppm in any food where foaming is a problem. Higher dosage of 100 to 1000 ppm could be used in wax tanks since the wax will be diluted by the weight of the fruit. The product is used as a shine enhancing agent in citrus wax and as an excellent food grade lubricant sprayed directly on fruit with a squirt bottle to bread up "log jams" on pack side Electrosan delivery boards. Its use as an antifoam is secondary to these uses.

COMPOSITION

Contains food grade defoaming agent.

STORAGE AND DISPOSAL

Store in a cool, dry place away from heat or open flame.

PHYSICAL PROPERTIES

Appearance:	Watery white light syrup
Specific gravity:	0.97 g/cc
Pounds/gallon:	8.09

SHIPPING CLASSIFICATION

Antifoam/Silicone for fruits and vegetables.
