PRODUCT DATA SHEET

Decco Fruit & Vegetable Kleen[®] 241

DESCRIPTION

Fruit & Vegetable Kleen[®] 241 is a cleaner concentrate for post harvest washing of citrus, apples, pears, stone fruits, potatoes, and other fruits and vegetables. The neutral pH of this soap allows it to be used with most fruits and vegetables.

DIRECTIONS FOR USE

Dilute one gallon of Fruit & Vegetable Kleen[®]241 with 39 gallons of water. Brush on fruit for 15 to 30 seconds. Rinse the fruit thoroughly.

In foam washers, dilute 1 gallon of FVK 241 with 18 to 24 gallons of water. Foam or spray this dilution onto the fruit for 15 to 30 seconds. Rinse the fruit thoroughly with fresh water. For fruit or vegetables that are hard to clean, use a solution that is as concentrated as needed for satisfactory cleaning.

For defuzzing peaches or cleaning plums and nectarines, dilute one gallon of FVK 241 with 80 gallons of water. Apply the dilution to fruit with appropriate spray nozzles, followed by a fresh water rinse. FVK 241 may be used on all fruit and vegetables as part of the Decco process, by or under the supervision of Decco personnel.

This product may be used to create foam in any commercial foam application. First use of this product should be on a trial basis until experience has been gained with it. Improper use may cause injury to the fruit or vegetable.

Store in cool, dry place. In case of a spill or leak, absorb liquid in vermiculite, chromosorb, sand or any other suitable material. Dispose of according to local regulations.

COMPOSITION

Contains detergents approved for use on raw agricultural produce as specified in Title 21 Section 173.315 of the Code of Federal Regulations.

PRECAUTIONS: The product is non-hazardous and non-toxic. Avoid contact with eyes.

PHYSICAL PROPERTIES

Appearance:	Slightly cloudy light yellow liquid
pH range:	8.0± 1.0
Specific gravity:	1.019 gm/cc
Pounds/gallon:	8.506
Flash point:	N.A.
