PRODUCT DATA SHEET

Citrus Lustr[®] 400 Fruit Coating

DESCRIPTION

Citrus Lustr 400 is a high shine coating for post harvest application to citrus fruit. The coating will reduce weight loss due to dehydration and serves as a compatible carrier for most fungicides. The product is suitable for application on citrus for export to Japan.

COMPOSITION

Citrus Lustr 400 contains FDA approved ingredients listed in CFR 21 for coatings on citrus. It contains water, natural resins, protein, fatty acid soaps, ammonia, silicone antifoam, selected fast evaporating alcohols, and propyl paraben as a wax preservative.

DIRECTIONS FOR USE

Apply Citrus Lustr 400 by spraying on well cleaned and fairly dry fruit without dilution. One gallon will coat approximately 8,000-10,000 pounds of fruit. Once opened, use the entire contents of this container within 120 days.

PRECAUTIONS Warning: See product label and MSDS for precautions and recommended first aid.

STORAGE AND DISPOSAL

Store this product in a cool dry place. Keep away from heat, sparks, and open flames. Avoid storage below freezing temperatures. If frozen, thaw completely prior to use.

Do not store open containers longer than 15 days; longer storage of opened containers may cause deteriorations of the wax and damage to apples treated with it. Do not use this product after the expiration date marked on the top of the drum.

PHYSICAL PROPERTIES

Appearance:	Light amber liquid
pH range:	8.8 ± 0.3
Viscosity:	12 ± 3 cps.
Specific gravity:	1.03 g/cc 8.59 lbs/gal
Percent:	19 ± 0.2

SHIPPING CLASSIFICATION

Freight classification:	Airfreight restricted article Article 969, Class 3
DOT Classification:	Coating, wax, fruit N.O.I.
