
PRODUCT DATA SHEET

Decco Carnauba Fruit Coating

DESCRIPTION

Decco Carnauba is a high gloss carnauba-based coating for postharvest application on citrus, apples, pomegranates and other commodities. The coating reduces weight loss due to dehydration, enhances the appearance of the fruit and serves as a compatible carrier for most post harvest approved fungicides.

DIRECTIONS FOR USE

Citrus, Apples and Pomegranates

Apply by spraying without dilution. Start with a rate of one gallon per 10,000 pounds clean damp fruit, and optimize the application rate for the best performance. When applying this product, use the least possible amount of anti-foam needed to control foam. Clean application equipment with warm water every day (use wax stripper as needed)

For others consult Decco personnel prior to use

COMPOSITION

This product contains water, wax, natural resins, fatty acid soaps, wetting agents and silicone antifoam, all FDA approved food grade ingredients.

PRECAUTIONS

Avoid breathing vapor. Keep container closed. Use with adequate ventilation. See label and MSDS for additional precautions and first aid.

STORAGE AND DISPOSAL

Store in a cool, dry place. Avoid freezing.

PHYSICAL PROPERTIES

Appearance:	Grayish brown translucent liquid
pH range:	8.8 ± 0.5
Specific gravity:	1.002 gm/cc
Pounds/gallon:	8.4
Flash point:	NA
Viscosity:	15 ± 4 cps
% solid:	23.5 ± 0.5

SHIPPING CLASSIFICATION

Coating (wax), fruit or vegetables (49981)

(Pd-Carnauba)
