DIRECTION FOR USE:

Apples: For postharvest application on clean apples. Apply one gallon to of Decco Lustr® 602 to 8,000 - 10,000 (1 liter per 1,000 kg) pounds of apples by spraying onto the fruits on a brush bed or other suitable applicator. Higher poundage of fruits can be treated on certain cultivars such as McIntosh, Golden Delicious, and Granny Smith. For best results, clean fruit with an appropriate Decco Cleaner prior to application of Decco Lustr® 602.

Citrus: For post harvest application on clean citrus. Apply Decco Lustr® 602 by spraying on clean and damp fruit without dilution. One gallon will coat approximately 8,000 pounds of small or 10,000 pounds of large clean, dry fruit. For best results, clean fruits with an appropriate Decco cleaner prior to application of Citrus Lustr® 602.

CAUTION: Condensation may form on apples following their removal from cold storage or for other reasons related to the manner in which they are stored, handled, processed, or packed. Subsequent evaporation of the moisture may cause white spotting of the fruit coating. Because condensation with resultant white spotting can be caused by many variable conditions, all of which are beyond the control of Decco US Post-Harvest, Inc., Decco US Post-Harvest, Inc. assumes no responsibility for white spotting following the use of this coating.

CONTENTS: Food grade ingredients listed in 21 CFR.
