

Decco Antifoam 032

Dimethyl Polysiloxane

DESCRIPTION

Some Decco processes, such as, drenchers, dip tanks, wash tanks, holding tanks, etc, in the field generate foam while in operation. In many instances foaming is undesirable, as it may tend to spot or mark the treated fruit pieces. The product is used as a shine enhancing agent in citrus wax and as an excellent food grade lubricant to break up "log jams" on pack side Electroscan delivery boards. Where necessary we recommend this food grade antifoam product for use by our service personnel or by our customers who use our products.

DIRECTIONS FOR USE

Decco Antifoam 032 is an emulsion of food grade water dilutable defoaming agent containing 30% silicone (a.i. Dimethyl Polysiloxane). The allowable direct use limit is 1 to 10 ppm in any food where foaming is a problem. Higher dosage of up to 1% could be used in wax tanks since the wax will be diluted by the weight of the fruit. Use the minimum quantity necessary to control foam in all re-circulating aqueous systems. Apply by batch application or by continuous feeding. For using in Spray bottles dilute one part with 30 parts of water. Mix well. Spray on foam blanket as needed.

CONTENTS

All FDA approved ingredients listed in 21 CFR.

HANDLING AND STORAGE PRECAUTIONS

MIX WELL BEFORE USE. Store in a cool, dry place away from heat or open flame. For more information see product label and MSDS.

PHYSICAL PROPERTIES

Appearance:	White Emulsion
Specific gravity:	1.01 g/cc
Pounds/gallon:	8.43
PH	6.0 ± 1
% Active silicone	30%

SHIPPING CLASSIFICATION

Antifoam/Silicone for fruits and vegetables.
