PRECAUTIONARY STATEMENTS:

- Wear protective gloves/protective clothing/eye protection/ face protection
- IF ON SKIN: Wash with plenty of soap and water.
- Call a POISON CENTER or doctor/physician if you feel unwell
- Wash contaminated clothing before reuse
- Dispose of contents/container to an approved waste disposal plant

Personal Protection Equipment (PPE):

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category A on an EPA chemical resistance category selection sheet.

Applicator and other handlers must wear: long-sleeved shirt, long pants, shoes, socks, protective eyewear (goggles or face shield) and chemical-resistant glove made of any waterproof material, such as polyvinyl chloride, nitrile rubber or butyl rubber.

For re-entry into treated areas during application and prior to ventilation or settling of aerosol fog, workers must wear coveralls over long sleeved shirt, long pants, shoes, socks and chemical resistant gloves made of ant waterproof materials such as polyvinyl chloride, nitrile rubber or butyl rubber; face sealing goggles, unless a full-face respirator is worn; and a NOISH approved respirator with an organic vapor (DV) cartridge or canister with any R, P or HE prefilter.

INGREDIENT: CLOVE OIL.....100%

DIRECTIONS FOR USE:

For Potato Sprout Inhibition

Decco Aerosol 100 can be applied any time after potatoes are stored. Initial and following application doses of **Decco Aerosol 100** vary to the potato variety, sprout growth stage, storage temperature, and storage length and storage design.

Decco Aerosol 100 is designed for use as an aerosol through Forced Air Distribution System. The application is usually performed by licensed applicators. Contact your local applicator for additional information.

Silver Scurf (*Helminthosporium solani*) Control in Storage

High initial dose of 130ppm or above may be required to eliminate Silver Scurf spores. Rates will depend on factors discussed under sprout inhibition. Applications for Silver Scurf control should be made after the storage has been filled and the cooling process has started. Additional applications may be required if the potatoes are disturbed.

- If entry into the storage area is necessary during or immediately following application before the fog has settled, protective clothing and respirators must be worn.
- Do not apply in the field.
- Do not use on seed potatoes.
- Do not allow vapors to come in contact with, or get near to, storage areas used for seed potatoes.
- Let sufficient time to elapse before using treated storage area for seed potatoes. All system components (including ducts) and building must be thoroughly cleaned and free of clove oil residue before areas are used for storage of seed potatoes.
- Decco 100 might prevent periderm formation of potatoes, therefore, it should be used only after wounds have healed completely.

Immediately call a POISON CENTER or doctor/physician
If inhaled: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing
If swallowed: Rinse mouth. DO NOT induce vomiting
If on skin or hair: Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse.
Please refer to SDS for FIRST AID and other MEASURES
EMERGENCY TELEPHONE NUMBERS: CHEMETREC: 800-424-9300 MEDICAL: 866-673-6671 Have the product container or label with you when calling a poison control center or doctor, or going for treatment

Environmental Hazards

Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash waters.
