

Rely+On™

RelyOn™ Cleaner and Broad Spectrum Disinfectant

No other disinfectant has the same composition or extensive portfolio of performance and testing data. It has been independently proven to be highly effective against over 100 strains of virus in 22 viral families, 400 strains of bacteria and over 100 strains of fungi.

A Unique Solution

- Powder based solution is easy to store
- De-Waxes, Cleans, & Disinfects in one step
- Kills pathogens within 10 minutes
- Breaks down waxes and cleans them away in minutes
- Removes labels from surfaces, belts, and rollers
- 100% non-corrosive in use dilution to most surfaces / Compatible with most hard non-porous surfaces
- Will not stain clothing/ Requires no additional PPE
- Non-irritating to eyes and skin in use dilution
- No fumes or offensive odor / Has a light citrus scent
- Approved by governments worldwide to combat major diseases. NSF / EPA / CA Registered / NOP compliant when used as labeled
- Degrades into organic salts
- 3 Year Shelf life/ Use Life of solution up to 7 days
- Can be wiped, mopped, sprayed, foamed, and fogged with no additives

General Steps

- 1 If required, remove gross dirt and debris with brushes or heavy rinse. (i.e. Heavily caked soil and/or large plant debris)
- 2 Prepare a 1.0% solution of RelyOn™.
- 3 Apply to surface using sponge, rag, mop, floor scrubber, power washer, brush, foamer, fogger, or spray, scrubbing as necessary until the surface is visibly clean.
- 4 Recommended contact time is 10-30 min depending on wax buildup, organic and inorganic load, and mechanical soils.
- 5 For Food Contact Surfaces:
 - Rinse or wipe down with at least potable water.
- 6 For Non-Food Contact Surfaces:
- 7 Simply allow to air dry or rinse, or wipe down, with potable water.

Disinfecting vs Sanitizing

Sanitizing reduces some pathogens by 99.9%. Disinfecting kills ALL label listed pathogens (bacteria, viruses, and fungi) by 99.999%. RelyOn™ takes disinfection further via a multifaceted mode of antimicrobial disinfectant action.
